

## ENVIRONMENTAL POLICY

*Tratter Engineering recognizes the immense importance of environmental protection as a central challenge for all of humanity and integrates environmental conservation into all aspects of its global business activities.*

Our responsibility is to continuously take measures to minimize the environmental impact of our company, efficiently use resources, reduce emissions, and make a positive contribution to society.

Tratter Engineering is committed to ensuring the well-being and safety of all employees and consistently promoting and improving health. Compliance with all regional laws and environmental regulations, fulfilling prescribed and voluntary commitments, as well as strict adherence to our company-wide ethical guidelines and codes of conduct, form the basis of our actions.

## CORE GUIDELINES

*Our actions are guided by the 17 Sustainable Development Goals (SDGs) of the United Nations.*

These SDGs form the basis of our company policy and reflect our commitment to sustainable and responsible business management. We actively strive to integrate these goals into our business strategy and align our business processes accordingly.

Our endeavor is to make a positive contribution to addressing global challenges such as poverty, social inequality, climate change, environmental protection, and education. Through the implementation of the SDGs, we aim to create a sustainable future for the upcoming generations while promoting social progress and economic stability.

## **PROMOTION OF ENVIRONMENTAL PROTECTION**

We are firmly committed to protecting our global environment and aim to continuously improve our environmental management system. In doing so, we not only adhere to strict laws and agreements but also establish measures for monitoring resources and emissions.

## **REDUCING CO2 EMISSIONS**

Tratter Engineering Srl aligns itself with the goals of the Paris Agreement and is strongly committed to achieving the climate targets defined therein. We are resolutely determined to actively contribute to reducing greenhouse gas emissions and play our part in combating climate change.

## **REDUCING ENVIRONMENTAL IMPACT**

We advocate for the efficient use of energy and resources to reduce waste and avoid the use of hazardous chemicals. In this regard, we consider responsible water management as our societal responsibility. Through longer product and service lifecycles, we aim to reduce our ecological footprint and support a recycling-oriented society.

## **RENEWABLE ENERGIES FOR A SUSTAINABLE FUTURE**

At Tratter Engineering Srl, renewable energies are the focus of our efforts for a more sustainable future. We increasingly rely on solar energy, wind power, and hydropower to reduce our dependence on fossil fuels and minimize environmental impacts. Through photovoltaic systems and hydropower in our processes, we generate clean energy and contribute to reducing our carbon footprint. Our investments in renewable energies go hand in hand with our responsibility for the environment and society, while also enhancing our economic efficiency.

## **RESPONSIBLE CHEMICALS MANAGEMENT**

We are aware of our responsibility towards the environment and advocate for responsible chemicals management. This means using chemicals judiciously to minimize environmental impact. We prefer environmentally friendly alternatives and ensure the avoidance or safe handling of hazardous substances. Through regular reviews, training, and information

transparency, we ensure the safety of our employees and the environmental compatibility of our processes.

## **SUSTAINABLE RESOURCE MANAGEMENT**

Our commitment to sustainable resource management is evident in our dedication to the efficient use of energy, water, and other raw materials. We rely on innovative technologies and processes to reduce energy consumption and minimize waste. By transitioning to renewable energies and implementing resource-efficient production methods, we actively contribute to reducing the environmental impact of our business activities.

## **COEXISTENCE WITH NATURE**

As a company, we strive to adopt exemplary measures to live in harmony with nature and respect biodiversity. We actively motivate our employees to support these actions.

## **PROTECTION OF ANIMALS, BIODIVERSITY, AND SUSTAINABLE LAND USE**

Animal welfare and the preservation of their habitats are of utmost importance to us. We prioritize animal-friendly practices in our operations and equally commit to the well-being of domestic and wild animals. We place special emphasis on appropriate care, feeding, and nurturing to ensure that animals under our influence are best protected.

In terms of land use, our goal is to preserve biodiversity and protect habitats. Our land use practices are purposefully aligned with these objectives. We are strongly committed to sustainable agricultural methods that not only maintain soil fertility but also minimize soil erosion and promote biological diversity. Our top priority is to shape land use in harmony with ecological needs. Through responsible practices, we aim to ensure that our activities protect natural habitats and contribute to the long-term preservation of biodiversity. Additionally, we actively oppose deforestation and contribute to maintaining healthy soil quality and reducing noise emissions.

## **DEVELOPMENT AND DISTRIBUTION OF SDG-ORIENTED PRODUCTS, INCLUDING ECO-FRIENDLY PRODUCTS**

We actively engage in the development and distribution of products that align with Sustainable Development Goals (SDGs) and contribute both to economic benefit and environmental and societal welfare.

## **PROMOTING ENVIRONMENTAL COMMUNICATION**

To strengthen environmental awareness, we promote sustainability training and internal communication for our employees. Moreover, we proactively disclose relevant environmental information to our stakeholders to enhance society's trust in us.

## **SUPPLY CHAIN**

We review and support the compliance with environmental protection requirements in our supply chain, urging our suppliers to pursue environmental protection goals that align with our long-term objectives. Our procurement procedures consider exemplary and suitable environmental practices, as well as the commitment to energy efficiency and emission reduction in the supply chain, which we actively promote.

We are determined to actively reduce our CO2 emissions. Specific target values are established, and we will continuously work towards decreasing our CO2 emissions.

Furthermore, we advocate for energy savings and the recycling of resources. Our goal is to realize a circular-oriented society by minimizing the use of natural resources and promoting the 3R approach (Reduce, Reuse, Recycle) for products.

Preserving the beautiful and diverse nature is a significant concern for us. Therefore, we actively engage in achieving harmonious coexistence with nature in our operational areas.
